## Cleaning Codes

**W-** Spot clean with soap and water: Clean this fabric with the foam only of a water-based cleaning agent to remove overall soil. Many household cleaning solvents are harmful to the color and life of the fabric. Cleaning by a professional furniture cleaning service only is recommended. To prevent overall soil, frequent vacuuming or light brushing to remove dust and grim is recommended.

**S-** Solvent clean only: Clean this fabric with pure solvents (petroleum distillate-based products, Energine, Carbona, or similar products may be used) in a well-ventilated room. Cleaning by professional furniture cleaning service only is recommended. Caution: Carbon Tetrachloride, as it is highly toxic. To prevent overall soil, frequent vacuuming or light brushing to remove dust and grime is recommended.

**WS-** Solvent or spot clean: Clean this fabric with the foam only of a water-based cleaning agent or with a pure solvent in a well-ventilated room (petroleum distillate-based products, Energine, Carbona, or similar products may be used). Cleaning by a professional furniture cleaning service is recommended. To prevent overall soil, frequent vacuuming or light brushing to remove dust and grime is recommended.

**X-** Clean this fabric only by vacuuming or light brushing to prevent accumulation of dust or grime. Water-based foam or solvent based cleaning agents of any kind may cause excessive shrinking or fading.

**Resilience TX-** Every Resilience TX fabric is tested and ensured not to pill or fuzz up like an old sweater. Resilience TX fabrics are immersed in stain-resistant finish allowing liquids to bead up; blot spill with towel.
